

**Aquestive is a pharmaceutical company advancing medicines to bring meaningful improvement to patients' lives through innovative science and delivery technologies.**

**OUR SUCCESS IS PROVEN:**

**2 decades**  
of innovation, growth,  
and delivering on our mission

**2.5+ billion**  
PharmFilm® doses shipped worldwide

**6 FDA approvals**

**Anaphylm™**  
(dibutepinephrine) sublingual film

is the first orally delivered film formulation of epinephrine in clinical development that is designed to treat severe allergic reactions without the need for an injector or mechanical device. Developed using both of our core technologies (PharmFilm® and AdrenaVerse™), Anaphylm is compact, portable, and easy to administer—ideal for real-world emergencies.

**OUR CORE TECHNOLOGIES:**

Since 2005, PharmFilm® has enabled trusted medicines to be delivered via simple, fast-dissolving oral films. Now, thanks to our novel prodrug platform AdrenaVerse™, we're exploring a new frontier in epinephrine-based therapies, including oral films and topical gels.

**PharmFilm®**

Our patented drug delivery method that utilizes a postage stamp-sized film to enable precise oral delivery of almost any active pharmaceutical ingredient.

**AdrenaVerse™**

Our prodrug platform allows precise control of epinephrine absorption and release across mucosal surfaces and skin, allowing for targeted treatment with minimal side effects.

**Why Aquestive?**

- ✓ **OVER 20 YEARS** of drug delivery innovation
- ✓ Established **U.S. MANUFACTURING** in Portage, Indiana
- ✓ Patent-protected **PROPRIETARY TECHNOLOGY**
